

YTD Refrigeration Glass Door Systems

Procurement Brief for Importers, OEMs and Refrigeration Equipment Buyers

Focus products: reach-in cooler/freezer glass doors, heated freezer display doors, walk-in cold room doors, specialty display doors, insulated glass assemblies and accessories.

Reach-in display door systems

Full-view / frameless door options

Heated insulated glass options

Company	Yongtengda Cold Chain Technology Co., Ltd.
Location	Xingfu Town, Boxing County, Binzhou City, Shandong Province, China
Contact	Phone / WhatsApp: +86 15954563555 Email: export@ytdglass.com Web: www.ytdglass.com
Important note	Technical and commercial parameters not yet confirmed by the factory are marked as Need factory confirmation.

1. Buyer-Facing Product Scope

This brief is designed for first-round purchasing review. It keeps the product range searchable and RFQ-ready while avoiding unverified commitments on MOQ, lead time, certification, warranty or capacity.

Product line	Typical buyer use case	Procurement value	Confirmation required
Reach-in cooler/freezer glass doors	Supermarkets, convenience stores, specialty markets	Insulated, glass, custom frame	Opening size, glass, OEM, heating voltage, hinge
Heated freezer display doors	Freezer merchandisers and high-humidity environments	Anti-condensation glass, frame options	Power, clear display, 3-phase, structure, operating temperature
Walk-in cold room doors and windows	Warehouses, food retail backrooms, food processing	Refrigerated, double-pane, heavy-duty	Panel thickness, door opening, lock/handle, threshold
Glass assemblies and accessories	Replacement, spare parts, add-ons	Insulated glass units, magnetic gaskets	Drawings, materials, dimensions, system compatibility and packaging

2. SKU Family Snapshot

The current SKU list contains 27 external model families. The recommended outreach focus for UAE and Saudi Arabia is to lead with RIC/HFD/WIC, and keep specialty display, glass assemblies and accessories as secondary discussion items.

Family	Count	Representative SKUs	Recommended buyer positioning
RI - Reach-In Glass Doors	14	RI-AL-01 / RI-FR-01 / RI-ST-01 / RI-PVC-01	Primary export line for display cabinet OEMs and supermarket refrigeration
SD - Specialty Display	3	SD-CV-01 / SD-SL-01 / SD-CB-01	Useful for food retail equipment makers after project requirement is defined
WI - Walk-In Cold Room	2	WI-CR-01 / WI-VW-01	Project-driven line for cold-room contractors and food storage applications
GA - Glass Assemblies	4	GA-IG-01 / GA-TG-01 / GA-CR-01 / GA-CC-01	OEM component line; quote only against drawings and glass specifications
PA - Parts & Accessories	4	PA-MG-01 / PA-HI-01 / PA-HA-01 / PA-SH-01	Support line for replacement and add-on orders.

Suggested first-contact attachment strategy

Attach	Purpose	Status
This procurement brief	Lightweight introduction and RFQ framing	Ready
Optimized SKU Master	Buyer/internal filtering and product family mapping	Ready
Detailed spec sheets	Per-product technical confirmation	Need factory confirmation

3. RFQ Matrix: Information Needed Before Quotation

Professional buyers will normally ask for the following information before a quote can be compared. Fields not yet confirmed should remain marked as Need factory confirmation until the factory provides drawings, data or documents.

RFQ field	Why it matters	Current external wording
Opening size / door size	Defines fit, drawing, tooling and price	Need factory confirmation
Glass structure	Determines insulation, condensation control and cost	Need factory confirmation
Heating and anti-fog	Critical for freezer and humid Gulf environments	Need factory confirmation
Voltage / wiring	Required for cabinet integration and safety review	Need factory confirmation
Frame material and color	Affects durability, appearance and commercial offer	Need factory confirmation
Handle / hinge / gasket	Determines usability and replacement compatibility	Need factory confirmation
Packing and loading	Important for breakage risk and landed-cost planning	Need factory confirmation
Certification documents	Required for importer onboarding and compliance checks	Need factory confirmation
MOQ / lead time / warranty	Commercial screening items	Quote case by case after technical confirmation

Controlled claim: Custom size, color, handle and logo options can be discussed after drawing confirmation. Avoid fixed MOQ, fixed lead time, unverified certifications, DDP promises, free samples or unconfirmed warranty terms in first-contact communication.

4. Procurement Notes for UAE and Saudi Arabia

Buyer concern	Why it matters in Round 1	Recommended response
Condensation control	High ambient humidity can make anti-fog performance a high priority for buyers.	Lead with heated glass/frame options, but keep power data as Need factor.
Energy and compliance review	Importers may ask for certificates or test data before purchase approval.	Only release product approvals. If not verified, write Need factory confirmation.
Cabinet fit and customization	OEM and distributor buyers need dimensions before opening size.	Before opening size, cabinet drawing, hinge side, voltage and target application.
Packing reliability	Glass-door breakage during export is a major buyer risk.	Buyers ask for packing photos, crate/pallet method and loading plan before large orders.
Commercial terms	Procurement screens suppliers quickly on MOQ, lead time and quantity.	Do not change MOQ after SKU, drawing and quantity are confirmed.

Suggested first-contact wording

We manufacture refrigeration glass door systems for commercial coolers, freezers and walk-in cold room applications. For accurate pricing, please share the cabinet opening size, target temperature, glass structure requirement, voltage and expected quantity. Technical parameters not listed in this brief will be confirmed with our factory before quotation.

5. Next Step: RFQ Intake

Step	Buyer provides	YTD provides
1. Application check	Cooler/freezer/cold room, target temperature, country	Recommended product family
2. Drawing/spec check	Opening size, cabinet drawing, hinge side, voltage	Technical confirmation list and possible structure
3. Quote preparation	Quantity, delivery country, packing expectations	Quotation after factory confirmation
4. Sample/project review	Project timeline and approval process	Sample/project plan after commercial confirmation
